Subject: Queries for Follow-Up Study

Eric, Please respond by e-mail, the queries you would perform to answer research questions we proposed. After the last TES conference call (which you were not available to participate), there was some confusion among us regarding whether a research question could be answered by one query. It was suggested during the conference call that the question could be answered by one query. However, since you will be generating the queries, we need you to confirm this.

We see two levels of research questions, and therefore, queries:

1. Queries to help us determine whether the study will be a "Go" or "No Go" and
- 2.
